## Arabian journal of geosciences template

This Web site requires you to use a web browser that supports frames. Sure. We support all top referral styles such as APA style, MLA style, Vancouver style, Harvard style, Chicago style, etc. For example, in the case of this magazine, when you write your paper and press automatic formatting, it will automatically update your article according to the Arabic journal of geosciences referral style. Guides Resources Citation styleThis is a short guide on how to format references and literature in a manuscript for the Arabic Journal of Geosciences. For a complete guide on how to prepare your manuscript refer to the magazine's instructions to the authors. Using report management software, you don't format your reports and bibliography manually. The easiest way is to use a reference manager: PaperpileThe cross-reference style is built-in and you can choose it in Settings &gt; Citation Style or Paperpile &gt; Citation Style in Google Docs.EndNote Find the style here: Mendeley, Zotero, Documents, and othersThe style is either embedded or you can download a CSL file supported by most reporting management programs. Syles BibTeXBibTeX are usually part of a LaTeX template. Check the instructions to editors if the publisher offers a LaTeX template for this time. Magazine articlesIn examples are references to articles in scientific journals and how they are supposed to appear in your literature. Not all magazines organize their published articles into volumes and topics, so these fields are optional. Some online journals do not provide a range of pages, but instead list an article ID. In a case like this it is safe to use the article ID instead of the page range. A magazine article with 1 authorMarquet PA (2002) Ecology. From predators, prey and laws of power. Science 295:2229-2230A journal article with 2 authorsIves AR, Whitlock MC (2002) Ecology. Inbreeding and postpopulation. Science 295:454-455A journal article with 3 authorsSchummers J, Yu H, Sur M (2008) Coordinated responses of astrology cells and their influence on hemodynamic signals in the visual cortex. Science 320:1638-1643A journal article with 5 or more authorsXiao F, Zong Q, Su Z, et al (2013) Determination of the mechanism of dawn proton cusp. Sci Rep 3:1654Books and book chaptersI say here are examples of references to authored and edited books, as well as book chapters. Burger M, Graeber B, Schindler G (2014) Energy risk management. John Wiley & Sons, Ltd, Chichester, UKChiapelli F (ed) (2012) Comparative Research and Efficacy Analysis for Practice (CEERAP): Health Care. Springer, Berlin, HeidelbergA chapter in an edited book Badiqué E (2006) Information and communication technologies in the SEVENTH EU Framework Programme. In: Levi A, Savaş E, Yenigün H, et al. (eds) Informatics and Information Sciences - ISCOS 2006: 21st International Symposium, Istanbul, Turkey, 1-3 November 2006. Process. Springer, Berlin, Heidelberg, pp 36-36Web sitesMerine internet references should appear directly in the text and not in the literature. See the instructions to the authors for Arabian Journal of Geosciences.Andrew E (2013) Photos of baby Olinguitos have been released. In: IFLScience. . Access on 30 October 2018Seeds This example shows the general structure used for government reports, technical reports and scientific reports. If you can't find the reference number, it might be best to report the report as a book. For the reports are usually not individuals credited as authors, but a government department or organization such as the U.S. Food and Drug Administration or National Cancer Institute. Government Accountability Office (2012) EGovernment Act: Agencies have implemented most provisions, but key areas of attention remain. U.S. Government Printing Office, Washington, D.C.Theses and Theses these including Doctoral Theses, Master's Theses or Bachelor theses follow the basic form described below. Gu P (2017) Advanced non-linear control and assessment methods for AC power generation systems. Ph.D. thesis, Southern Illinois UniversityNews paper articlesAn scientific journals, newspapers do not usually have a volume and publishing number. Instead, the full date and page number are required for a correct report. Walsh MW (2012) The new Rules of the Ministry of Finance facilitate the purchase of 401(k) revenues. New York Times B4In-text references References should refer to the text with the name and year in parentheses:This sentence mentions a reference (Marquet 2002). This proposal mentions two references (Ives and Whitlock 2002; Marquet 2002). Here are examples of in-text references with multiple authors: Two authors: (Ives and Whitlock 2002)Three or more authors: (Xiao et al. 2013)Full magazine title Arabian Journal of GeoscienceAbbreviationArab. J. Geosci.ISSN (print)1866-7511ISSN (online)1866-7538ScoscopeGeon Earth and Planetary SciencesGenic environmental sciencesOliana submission of a manuscript implies: that the work described has not been published before; whereas it is not considered for publication anywhere else; Whereas its publication has been approved by all co-authors, if any, and by the competent authorities – implicitly or explicitly – at the institute where the work has been carried out; The issuer will not be held legally liable in the event of claims for damages. Rights Authors who wish to include numbers, tables or snippets of text already published elsewhere must obtain permission from copyright holders for both print and electronic form and include that such authorisation has been granted at the time of submission of their documents. Any material received without such evidence shall be deemed to come from the authors. Online Submission Follow the Submit online hyperlink on the right and upload all your handwritten files after given on the screen. Make sure that you provide all relevant editable source files. Failure to submit these source files may cause unnecessary delays in the review and production process. Meteorite Writers studying meteorites should make sure that meteor names are approved by the Meteor Nomenclature Commission of the Meteor Society. Existing meteor names should be in accordance with the Meteorological Bulletin of the Meteorological Society (see electronic database). You can consult the guidelines on the meteor nomenclature online. Cover page Before submitting, please be sure to prepare a short cover letter addressed to the editor-in-chief. The letter must contain three paragraphs. (1) The first should introduce the authors and declare that they are submitting a manuscript (titled) for review. (2) The second paragraph should cover the subject of handwriting (e.g. briefly describe the objectives, methods, important results and scientific implications). (3) The third paragraph should describe the contribution of the manuscript to the sector and its suitability for the magazine. Revised Handwriting Clearly displays the main revisions to the text, either in different color text, highlighting changes, or with the Microsoft Word Change Tracker feature. This is in addition to describing changes to your point from cover letter point (i.e. replies to reviewers' comments). Use this template title page to provide the following information. The title page should include:The name(s) of the author(s) Summary title(s) of the author(s), i.e. institution; (section), city, (state), countryA clear indication and active e-mail address of the respective author If available, the author's 16-digit ORCID(s) If address information is provided with the relationship(s) will also be published. For writers who are (temporarily) unconnected they will only capture their city and country of residence, not their email address, unless explicitly requested. Summary Please provide a summary of 150 to 250 words. The summary must not contain unspecified abbreviations or indeterminate references. For life science journals only (where applicable) Trial registration number and registration date Trial registration number, registration date followed by keywords retroactively registered Please provide 4 to 6 keywords that can be used for indexing purposes. Statements All manuscripts must contain the following sections under the heading Declarations. If any of the sections are not related to your manuscript, please the heading and write Not applicable for that section. For use for non-life science journalsFinance (information explaining whether and by whom research was supported)Conflicts of interest/Competitive interests (include appropriate disclosures)Availability of data and material (data transparency)Availability of code availability (software application or custom code)Authors code)Authors (optional: read the submission instructions from the magazine if the declarations are mandatory) appropriate declarations)Consent to publication (includes appropriate declarations)Availability of data and material (data transparency)Availability of code (software application or custom code)Authors' contributions (optional: read the submission instructions from the magazine if the declarations are mandatory) appropriate declarations)Consent to publication (includes appropriate declarations)Availability of data and material (data transparency)Availability of code (software application or custom code)Authors' Scripts must be submitted to Word.Use a regular, simple font (e.g. 10-point Times Roman) for text. Use italics to emphasize. Use the automatic page numbering function to number the pages. Do not use field functions. Use tabs or other commands for indents, not spacebar. Use the table function, not spreadsheets, to make tables. Use the equation editor or MathType for equations. Save your file in docx (Word 2007 or later) or document format (earlier versions of Word). Manuscripts with mathematical content can also be submitted to LaTeX. LaTeX Macro Pack (Zip Download, 188 kB) Headings Use no more than three levels of displayed headings. Abbreviations Abbreviations should be defined at the time of first reference and used consistently thereafter. Footnotes Footnotes can be used to provide additional information, which may include the reference of a reference included in the reference list. They should not consist solely of a reference reference and should never include the bibliographical details of a reference. They should also not contain figures or tables. Footnotes in the text are numbered sequentially, those in the tables should be marked in superscript lowercase letters (or asterisks for values of importance and other statistics). Footnotes in the title or authors of the article are not given reference symbols. Always use footnotes instead of endnotes. Recognitions Recognitions of people, grants, funds, etc. The names of the funding agencies should be fully written. Important note: All documents must be in a double format and in one column. Report references to text with name and year in parentheses. Some examples: The negotiation survey covers many sectors (Thompson 1990). This result was later contradicted by Becker and Selgman (1996). This effect has been widely studied (Abbott 1991; Barakat et al. 1995a, b; Kelso and Smith 1998; Medvec et al. 1999, 2000). Reference List The list of references should include only published or accepted for publication. Personal communications and unpublished works should only be mentioned in the text. Do not use footnotes or endnotes as a substitute for a report list. The reference directory entries should be alphabetical with the last name of the first author of each project. Series multi-author publications of the same first author alphabetically in relation to the second, third, etc. Publications of the exact same author(s) must be ordered chronologically. Gamelin FX, Baquet G, Berthoin S, Thevenet D, Nourry C, Nottin S, Bosquet L (2009) Effect of high intensity intermittent education on heart rate variability in pre-teen children. Eur J Appl Physiol 105:731-738. the names of all authors will be provided, but the use of et al in large author lists will also be acceptable: Smith J, Jones M Jr, Houghton L et al (1999) Future of health insurance. N Engl J Med 365:325–329 Article by DOI Slefka MK, Whitton JL (2000) Clinical effects of regulated cytokine production. J Mol Med. J, Blass B (2001) The future of modern genomics. Blackwell,

LondonBook chapterBrown B. Aaron M (2001) The Politics of Nature. In: Smith J (ed) The Rise of Modern Genomics, 3rd edn. Wiley, New York, pp 230-257Online paper Cartwright J (2007) Big stars have the weather too. IOP Web Physics Publication. . Approached June 26, 2007E qualifierSW (1975) Experimental acute renal failure. Thesis, University of Californialn order to use the standard abbreviation of a magazine's name according to the ISSN directory of the title Word Abbreviations, see ISSN LTWA If you are sure, please use the full title of the magazine. For authors who use EndNote, Springer provides an output style that supports formatting references to text and a list of references. EndNote Style (Download zip, 3 kB) Springer accepts electronic media files (animations, movies, audio, etc.) and other additional files that will be published online along with an article or book chapter. This feature can add dimension to the author's article, as some information cannot be printed or is more convenient in electronic format. Before submitting research datasets as additional information, authors should read the journal's research data policy. We encourage research data to be archived in repositories where possible. Submit Supply all additional material in standard file formats. Include the following information in each file: article title, magazine name, names author names, author names, author names, author names, and the e-mail address of the corresponding author. To customize user downloads, note that larger files may require very long download times and that some users may experience other problems downloading. Audio, video, and animation aspect ratio: 16:9 or 4:3 Maximum file size: 25 GB Minimum video video 1 sec Supported file formats: avi, wmv, mp4, mov, m2p, mp2, mpg, mpeg, flv, mxf, mts, m4v, 3gp Text and presentations Submit your hardware in PDF format; .doc or .ppt files are not suitable for long-term viability. A collection of numbers can also be combined into a PDF file. Spreadsheets Spreadsheets must be submitted as .csv or .xlsx files (MS Excel). Specialized formats Specialized formats such .pdb (chemicals), .vrl (VRML), .nb (Mathematica notebook), and .tex can also be provided. Multi-file collection Multiple files can be collected in a file .zip or .gz. Numbering If any additional material is provided, the text must specifically refer to the material as a reference, similar to that of numbers and tables. Refer to supplementary files as Online Resource, for example . as shown in the animation (Online Resource 3). ... additional data is provided in Electronic Resource 4. Name the files sequentially, e.g. ESM\_3.mpg, ESM\_4.pdf. Caption For each additional material, please provide a brief caption describing the content of the file. The processing of additional files Additional Information (SI) will be published as received by the author without any conversion, editing or reformatting. Accessibility To give people of all abilities and disabilities access to the content of your supplementary files, make sure that the script contains a descriptive caption for each supplemental materialVideo files contain nothing that flashes more than three times per second (so that users prone to seizures caused by such effects are not compromised) This journal is committed to supporting the integrity of the scientific file. As a member of the Ethics Committee for Publications (COPE), the magazine will follow Cope's guidelines on how to deal with possible misconduct. Authors should refrain from misleading the results of research that could damage trust in the journal, the professionalism of scientific paternity, and ultimately the entire scientific endeavor. Maintaining the integrity of research and its presentation is enhanced by following the rules of good scientific practice, which include\*: The manuscript must not be submitted to more than one journal for simultaneous examination. The submitted works should be original and not published elsewhere in any form or language (partially or in full), unless the new work concerns an extension of previous work. (Please provide transparency on re-informing material to avoid concerns about text recycling (self-plagiarism). quantity of submissions and be submitted to various magazines or to a newspaper over time (i.e. 'salami-slicing/edition'). Simultaneous or secondary publication is sometimes justified if certain conditions are met. Examples include: translations or a manuscript intended for a different group of readers. The results should be presented clearly, honestly and without constructing, falsifying or improper falsification of data (including image manipulation). Authors should observe specific rules for obtaining, selecting and processing data. There is no data, text or theories from others, as if they were not the author's own (plagiarism). Appropriate recognitions must be given to other works (this includes closely copied material (near full format), concise and/or paraphrased), quotation marks (to indicate words received from another source) are used for the complete copying of material and rights guaranteed for copyrighted material. Important note: the magazine can use screen software for plagiarism. Authors should ensure that they have rights to use software, survey questionnaires/(web) and scales in their studies (if necessary). Research articles and non-research articles (e.g. opinion, review and commentary articles) should provide appropriate and relevant literature in support of the claims made. Excessive and inappropriate self-referral or concerted efforts among various authors to collectively report themselves are strongly discouraged. Authors should avoid false statements about an entity (which may be an individual or a company) or descriptions of their behavior or actions that could potentially be considered personal attacks or allegations about that person. Research that can be mis-applied to pose a threat to public health or national security should be clearly identified in the manuscript (e.g. dual use of research). Examples include the creation of harmful effects of biological agents or toxins, the disruption of vaccine iness, the unusual risks in the use of chemicals, the weaponization of research/technology (among others). Authors are advised to ensure that the group of authors, the corresponding author and the order of the authors are all correct when submitting. Adding and/or deleting authors during the review stages is generally not allowed, but in some cases may be justified. The reasons for the changes in writing should be explained in detail. Please note that changes to the writing cannot be made after a manuscript has been accepted. \*All of the above are guidelines and authors must ensure that they respect the rights of third parties, such as copyright and/or moral rights. Upon request, authors should be prepared to send relevant documents or data in order to verify the validity of the results presented. This could be with the raw data, samples, files, etc. Sensitive information in the form of confidential or proprietary data is excluded. If misconduct or alleged fraud is suspected, the Journal and/or the Publisher will conduct an investigation in accordance with COPE guidelines. If, following an investigation, there are legitimate concerns, the authors concerned will contact their specific email address and be given the opportunity to address the issue. Depending on the situation, this may result in the application of the following measures, including, but not limited to: If the manuscript is still under consideration, it may be rejected and returned to the author. If the article has already been published on the internet, depending on the nature and severity of the infringement: - an erratum / correction can be placed with the article- an expression of concern can be placed with the article- or in severe cases article retraction can occur. The reason will be stated in the published note of correction/correction, concern or withdrawal. Please note that the recall means that the article is kept on the platform, watermark revoked and the explanation for the recall is provided in a note linked to the watermark article. The author's institution may be informed A notice of alleged breach of ethical standards in the peer review system may be included as part of the author's bibliographical record and article. Fundamental Errors Authors have an obligation to correct errors as soon as they discover a significant error or inaccuracy in their published article. Authors are/are invited to contact the magazine and explain in what sense the error affects the article. A decision on how to correct the literature will depend on the nature of the error. This can be a correction or recall. The recall note should provide transparency which parts of the article are affected by the error. By proposing/excluding reviewers Authors are welcome to propose suitable reviewers and/or to request the exclusion of certain individuals when submitting their manuscripts. When proposing reviewers, authors should make sure that they are completely independent and not associated with the work in any way. It is recommended to propose a combination of reviewers from different countries and different institutions. When you suggest reviewers, the corresponding author must provide an institutional e-mail address for each proposed reviewer or, if this cannot include other means of authentication, such as a link to a personal home page, a link to the publishing record, or a researcher or author ID in the submission letter. Keep in mind that Journal may not use suggestions, but suggestions are appreciated and may facilitate the peer review process. These guidelines describe the principles of paternity and good writing practices that prospective authors should adhere to. The author clarified that the Journal and the Publisher assume that all authors agreed with the content and that they all gave explicit consent to the submission and that they received the consent of the competent authorities of the institute/organisation where the before the submission of the work. The Publisher does not specify the types of contributions justifying writing. It is recommended that authors adhere to the writing guidelines in force in their specific research field. In the absence of specific guidelines, it is recommended that in the following guidelines\*:All authors whose names appear in submission 1) contributed substantially to the conception or design of the project; or the acquisition, analysis or interpretation of data; or the creation of new software used in the project;2) drew up the work or reviewed it critically for important intellectual content; 3) approved the version to be published; and 4) agree to be accountable for all aspects of the project, ensuring that issues related to the accuracy or integrity of any part of the project are properly investigated and resolved. \* Based/adapted by: ICMJE, Determining the role of authors and contributors, Transparency in the contributions and responsibilities of authors to promote integrity in scientific publication, McNutt at all, PNAS February 27, 2018 Disclosures and Statements All authors are invited to include information on sources of funding, financial or non-financial interests, study-specific approval by the ethics committee responsible for research concerning humans and/or animals, informed consent whether the investigation concerned human participants, and a statement on animal welfare, whether the research involved animals (as milked). The decision as to whether this information should be included depends not only on the scope of the newspaper, but also on the scope of the article. Work submitted for publication may have an impact on public health or general well-being and, in such cases, it is the responsibility of all authors to include appropriate disclosures and declarations. Data transparency All authors are invited to ensure that all data and materials, as well as the software application or custom code support their published claims and comply with field standards. Please note that magazines may have individual policies for (sharing) research data in accordance with disciplinary rules and expectations. The role of the corresponding author A writer is assigned as corresponding author and acts on behalf of all co-authors and ensures that questions related to the accuracy or integrity of any part of the work are treated appropriately. The corresponding author is responsible for the following requirements: ensuring that all listed authors have approved the manuscript prior to submission, including the names and order of the authors. the management of any communication between the Journal and all co-editors before and after publication;\* providing transparency on the reuse of the material and indicating any unpublished material (e.g. handwritten in the press) contained in the manuscript in a cover letter to the author; Whereas disclosures, statements and transparency of data declarations by all authors are included in the manuscript as appropriate (see above).\* The requirement to manage all communication between the magazine and all co-authors at the time of submission and shielding may be delegated to a contact or editor. In this case, make sure that the Corresponding Author Comparison Contributions In the absence of specific guidelines and research areas where distinct efforts can be described, the Publisher recommends that authors include statements of contribution to the work that determines each author's contribution to promoting transparency. These contributions should appear on the separate title page. Examples of such statements are presented below.\* Free text:All authors contributed to the conception and design of the study. The preparation of the material, the collection and analysis of the data were carried out under [full name], [full name] and [full name]. The first draft of the manuscript was written by [full name] and all the authors commented on previous versions of the manuscript. All authors read and approve the final manuscript. Example: Classification CEdiT: • Conceptual: [full name], ...? Methodology: [full name], ...? Official analysis and investigation: [name], ...? Writing - initial preparation plan: [full name, ...]; Writing - review and editing: [full name], ...? Acquisition of funding: [full name], ...? Resources: [full name], ...? Monitor: [full name],.... To review articles where discrete statements are less applicable, you should include a statement that had the idea for the article, who conducted the bibliography search and data analysis, and who authored and/or critically reviewed the work. For articles based primarily on the thesis or thesis of the student, it is recommended that the student is usually referred to as principal author: A graduate student's guide to determining paternity credit and authorship Order, APA Science Student Council 2006 Affiliation The main affiliation for each author should be the institution where the majority of their work was done. If an author has subsequently moved, the current address can additionally be declared. Addresses will not be updated or modified after the article is published. Changes in writing Authors are strongly recommended to ensure the correct author group, the corresponding author, and the order of the authors when submitting. Changes in paternity by adding or deleting authors and/or changes to the corresponding author and/or changes to the order of authors are not accepted after acceptance of a manuscript. Please note that the names of the authors will be published exactly as they appear in the accepted submission! Make sure that the names of all authors are present and typed correctly and that addresses and collaborations are current. Adding and/or deleting authors at the review stage is generally not allowed, but in some cases may be justified. The reasons for these changes in writing should be explained. Approval of the change during the review is in the the Editor-in-Chief's discretion. Note that magazines may have individual policies for adding and/or deleting authors during the review stage. Author ID Authors are recommended to use the ORCID when submitting an article for review or to obtain an ORCID through the submission process. Submission. or incompetent authors For cases in which a co-author dies or is incapacitated during the peer writing, submission or evaluation process, and co-authors consider it appropriate to include the author, co-authors should obtain approval from a (legitimate) representative who could be a direct relative. Paternity issues or disputes In the event of a paternity dispute during peer review or after acceptance and publication, the Journal will not be able to investigate or rule. Authors will be asked to resolve the dispute themselves. If the Journal is unable to withdraw a manuscript from the drafting process or in the case of a published document, to raise the matter with the institution or institutions of the authors and to comply with its guidelines. Confidentiality Editors should treat any communication with the Journal as confidential, which includes correspondence with direct representatives from the Journal, such as editors and/or editors of handling and reviewers' reports, unless explicit consent has been obtained for the exchange of information. After acceptance, your article will be exported to production to be submitted to an itemization. Once the setup is complete, you'll receive a link asking you to confirm your relationship, choose the publishing model for your article, and arrange permissions and payment of any related publishing costs. Once you have completed this, your article will be edited and you will receive the receipts. Article Publishing Agreement Depending on the ownership of the magazine and its policies, you will either grant the Publisher an exclusive license to publish the article or you will be asked to transfer the article's copyright to the Publisher. Offprints Offprints can be ordered by the corresponding author. Color visualizations Publishing color visualizations is free. Proof reading The purpose of proof is to check for haunting or conversion errors and the completeness and accuracy of text, tables and numbers. Substantial changes in content, e.g., new results, corrected values, title and paternity, are not allowed without the approval of the Editor.After online publication, further changes can only be made in the form of an erratum, which will be linked to the article. Open Choice allows you to publish open access to more than 1850 Springer Nature journals, making your research more visible and accessible immediately after it's published. Article editing charges (APC) vary by magazine – see the full ListBenefits: Increased Researcher Engagement: Open Choice allows access by anyone with an internet connection immediately after publication. Greater visibility and impact: In hybrids Springer, OA articles are approached 4 times more often on average and refer to 1.7 times more times on average\*. Easy compliance with funders and institutional mandates: Many funders require open access publication, and some take compliance into account when evaluating future grant applications. It's easy to find funding to support support access – please see the funding and support pages for more information. Springer Nature Hybrid Journal OA Impact Analysis, 2018. Open Choice Funding and Support Pages Copyright and License Term – CC BY Open Choice articles do not require copyright transfer as copyright remains with the author. By choosing open access, the author(s) agree to publish the article under the Creative Commons License Report. Find more about the license for authors and reviewers to help the work presented in your Manuscript that needs to reach the English language is of sufficient quality to be Sub-Humanized. If you need help with eager in English you should consider: Asking a colleague who is a native English speaker to review your Manuscript for clarity. The visit of the English language teacher covers common mistakes when willing in English. Using a Professional Language Editing Service Where Authors will imagine English to enrich that your feeling is clear and identity problems require your review. Two such services are provided by your nature research editing service subsidiaries and American Journal Experts. Springer authors are introduced at a 10% discount for their first shipment to any of these services, just follow the links below. English Language Research Tutorial Processing Service American Journal Experts Notice Note that the use of a language editing service is not a public relations request in this journal and does not imply or guarantee that the article will be selected for peer review or accelerated. If your manuscript is accelerated, it will be checked by our copied authors for sale and official style before publication. . 为 辑 评审 专 确 评估 您 您 确 您 语 语 质 British.
